VISION - Continue to Fortify the Industry

Who can forget - 1907

I was trying to make something really hard, but then I thought I should make something really soft instead, that could be molded into different shapes. That was how I came up with the first plastic, called it bakelite.

(Lee Bakland)

Plastics - An Amazing Invention

- Lightweight
- Tough
- Transparent
- Waterpoof
- Versatile - able to mold, laminate, shape - suitable for almost any application and now...........many plastics can be chemically, mechanically or thermally recycled

- The early 60’s saw remarkable improvement in manufacturing processes that brought down the cost of making plastics

- Since its advent the industry has recorded growth in its production - Asia currently dominating 49%, with UAE’s share of 24.2% p.a. (Zawya-2017)

PLASTICS MADE THE MODERN WORLD

Plastic Everywhere – the list is endless!!

Homes
- Huge percentage being used in household and home appliances
- Use of plastic foam in furniture
- Floor covering, if not wood, probably has a synthetic/natural fiber blend inside your kitchen plastic in form of chair, bar stools, seats, plastic countertops in non-stick cooking pans, plastic plumbing in your water system

Healthcare
- Use of plastics has made health care more simpler and less painful
- Plastics are being used from casing of an open MRI machine to the smallest tubing, disposable syringes, intravenous blood bags as well as heart valves
- Reduced the weight of eyeglass frames and lenses

Food
- Food in the fridges is wrapped in PVC cling film
- Dairies bought at the supermarkets is in plastic tubs, wraps, blow-molded containers, including the interiors of cans are lined with plastic polymer

Transport
- Trains, planes, and automobiles — even ships, satellites and space stations all use plastics extensively. Seating, panels, instrument enclosures, surface coverings, etc.
- Even skateboards, roller blades, and bicycles use plastics

Automotive
- High performance plastics are playing an important role
- Minimal corrosion for longer vehicle life
- Safety, comfort and economy
- Recyclability
- The light weight of plastics makes for more fuel efficient vehicles
- Every 10% reduction in vehicle weight results in a 5% to 7% reduction in fuel usage

Market Facts
- Production of Plastics worldwide growing at a rate of 5% per year across all industries
- Petrochemicals Sector being positioned as the largest driver of global oil consumption (IEA)
- UAE - the Arab world’s second largest economy
- Ongoing growth in the UAE and GCC construction industry will propel demand for plastic products
- The Middle East Petrochemical producers are racing to expand.
- Plastics and Chemicals to account for the largest share of global crude demand growth by 2030!
- GDP growth in the Gulf region is estimated to 3 per cent in 2019 (IMF)
